ADDENDUM 1

Date: July 11, 2019

RFP No: IT-02-19 / Wireless Services

Bid Date: July 17, 2019/2:00 PM Local Time

The following clarifications, changes, additions, and/or deletions are hereby made to the RFP:

Can you clarify your definition of "fixed position wireless devices"?

A fixed position wireless device is one that would serve a site such as a traffic signal or water pump station where the device is not mobile, but needs to have connectivity. They will be used to monitor traffic controllers at intersections and water flows at pump sites.

Section 2. Scope of Services Requested, Plans, it states "Capped data with no phone or text for mobile hotspots and fixed position wireless devices" Could the City please explain if this related to a Machine to Machine application such as collections or meter monitoring?

Yes, this would be sites such as traffic signal controllers or water utility SCADA monitoring.

Could the city provide an estimate of how many lines or the first project they are asking for?

No estimate at this time. The City currently has 200 smartphone plans and 51 feature phones. There are currently around 120 traffic intersections and 35 water utility SCADA sites that may need connectivity in the near future.

No throttling of data for devices with Priority Service yes/no..... May we have more details to this question? Is it a "yes" that statement is correct? Or "No" we do not throttle? For example, we do not permit throttling on Public Safety Plans.

The question to clarify is: "Do you throttle first responder plans that have priority service?" Yes or No

We understand the scope of work in the "yes and no" questions in section 2

When we reviewed section 3, should we be providing the plans available on DIR that align with the "yes and no" questions in section 2? All condensed to a 5 page maximum?

Example: Unlimited Phone and Text with No Data. We would attach that plan from our DIR agreement, so you have the specific values?

This RFQ does not specify to use DIR pricing if available, we want the carrier's best pricing.

What would be the first main project for this? This would help us give an accurate quote to the solution.

The first main project would be for fixed-position wireless devices for traffic signal monitoring and SCADA monitoring for our water and sewer stations.

Will the City award contracts to multiple bidders that offer a subset of the requested scope of services? In particular, will the City consider awarding a contract to a vendor that offers Devices and related Customer Services, but not cellular Services, Plans, Billing or Cellular Coverage?.

No.

For other questions or clarifications, please contact the Purchasing Division at SAPurch@cosatx.us.

Sincerely,

A handwritten signature in blue ink that reads "Nolan A. Sosa".
